Objective

Seeking a challenging computer engineering role in a dynamic company to leverage my technical skills for innovative solutions and industry growth, while expanding my expertise.

Experience

Computer Engineering Intern - SAASST (May 2024 - July 2024)

- Developed AI models for space data analysis.
- Applied machine learning for satellite image processing.
- Integrated AI solutions with space science frameworks.

Project Intern - AUS (January 2023 - May 2023)

- Worked on a blockchain project for the healthcare sector.
- Developed Solidity-based program for monitoring vaccine temperature.
- Integrated Oracle's Provable Service for real-time monitoring.

Competitor - CPTC (October 2022 - November 2022)

- Competed in penetration testing competition, securing 2nd place regionally.
- Executed network attacks, social engineering, and phishing simulations.
- Compiled a 40-page report and received wildcard invitation for finals in the USA.

Education

Bachelor of Computer Engineering - American University of Sharjah (2021 - Present)

High School Diploma - New Middle East International School (Grade 12: 93%)

Technical Skills

Python, C++, MySQL, Microsoft Office
